

On display at make: faire would be two of our projects:

Project I: Science of Play creative toolbox (with LIEN foundation)

– create and distribution craft kits for low-income families to create together. There would also be with complementary programmes to support the families.

Display: craftwork and a demonstration of how to turn everyday items into beautiful craft.

Project II: A Garden in Every Preschool (various preschools)

– the aim is to create a garden space for children to get in touch and experience nature. There would also be a comprehensive curriculum to support the gardening project.

At the fair, we would be displaying simple planting projects that can be created in every household.

**pictures are for illustration purposes. Actual display may differ.*
